DIARY NOTESExecutive Director-Comptroller

11 August 1965

25X1

1. [redacted] was up to give me a briefing on the Interagency Defector Committee. It seems that not much is new since I last had contact with this program and that business is declining a bit. I expressed an interest in receiving his annual statistical reports.

2. I invited Bob Bannerman's attention to John Warner's Memorandum for the Record dated 10 August on the subject of telephone intercepts. I told Bob that I was a little surprised that the Department of Justice expected us to render a written reply and that he should check it out with either Dick Helms or me before a report is sent.

3. I talked with Dr. Harry King and made tentative arrangements to have him here for lunch on Wednesday, 25 August.

4. John Clarke, [redacted] briefed me on the Consolidated Cryptologic Program, Agency involvement, and how we make our input to the overall Program.

25X1

5. I met with Dick Helms and discussed the following:

a. I talked with Dick about the JM WAVE housing allowances. I reminded him of his memorandum, written while he was DD/P and based on his conversation with General Carter, that we should not change these allowances. I asked him if he was really satisfied with this now that he is the DDCI or if he wanted to take a new look at the problem. He told me that he did feel that the situation was well in hand and saw no reason to take a new look at this time. (I advised Jack Earman and Bob Bannerman of this decision.)

b. I philosophized with Dick about how we could effect organizational changes within the Agency, adhering to the principle that minor changes could be made by Deputy Directors with BPAM merely monitoring the change. Significant changes, such as the establishment of new ~~positions~~^{stations} or elimination of old ones, should be formally presented as should any requirement for an increase in personnel ceiling. He agreed with this philosophy but asked me to put something on paper, sometime after my return from leave, for his consideration.
